GLOW IN THE DARK

GLOW IN THE DARK:

"vinyl noise" is loud and clearly audible.

It's strongly advised to use it as SPLATTER?MARBLE effect with CLEAR CRISTALLO base what results with good audio quality and spectacular looking vinyl.

SPLATTER & MARBLE

Splatter & marble are the simplest vinyl effect to manufacture what makes them most popular. General rule is to use solid or transparent base colour with addition of other solid colours. Mixing transparent colours is unpredictable and should be avoided. During heating and pressing process raw materials are blending in and final vinyl look will be different than desired.

SPLATTERS

WHITE1154 / RED 8227

BLACK / WHITE 1154
